

Sean Harder

CSC-4710 Journal

Jan 27th

- I Brought up the concern of using C++ on the Server
- This concern was because the Server team did not know how to make Backend endpoints to the D.B
- I Explained I wont be able to help if they get stuck in C++
- It Makes more sense and is easier to use JS since it is already being used on the frontend
- Explain how the frontend Server and db will connect
- Explained how Socket.io works

Jan 29th

I worked on my part of the
Slide Show

Feb 3rd

- I made an outline for the Project Plan document
- I fixed formatting Issues
- I made comments on other team members Parts

Feb 5th

- I suggested A way we should do our Clickop
- Finished up my section of the project plan

Feb 9th

- I helped out a team member with adding the team Schedule to the Project doc

Tuesday Feb 16th, 2026

-Talked with my group and Broke up
walk through Slides

Monday Feb 23rd, 2026

- I made the UI Mock ups

- These UI Mock ups include

↳ All flights screen where they can see all the upcoming flights in time order

They can also filter by departure or arrival

↳ Flight Info Screen

This is a search bar they can use in case they are asking about a specific flight

↳ Flight Selection

This screen asks for

from, to, departure, return

and then returns all the flights with seating available

Thursday March 6th, 2026

- we broke up the WTK #2 doc
- I did my part
- I refactored the doc
- I took meeting minutes

Wednesday 11th, 2026

- ↳ Set up docker for my team
- ↳ did 1 on 1's with people to make sure it was working and they did not have any issues

Tuesday 17th, 2026

- ↳ Talked with group
- ↳ Broke down the user manual
- ↳ assigned sections to get it done

Thursday 19th, 2026

- Helped another team member
- figured out how to get docker
- to have hot reloading

Friday 20th, 2026

- talked to a teammate about halting login functionality
- worked on admin page

- March 21st
worked on walkthrough #3

- March 24th
Talked with Jack about requirements
for live days

- March 30th
got all of our questions answered
in meeting

- Apr 1st

- Jack and I meet about the data base
and making sure the Simulation is working
- the database Schema
- And making sure all the requirements work

- Apr 2nd

talked about further work
↳ such as adding meeting mon
↳ walkthrough

- Apr 3rd
talked about Client Install, Code Review,
Pitch

- Skipped,
Skipped

I work on other projects and
Homework preparing for finals

APR 12 - APR 25

- I decided to stop waiting for the backend team
↳ I used chat to generate our complex 2D array with (200.14) flights
- I created 3 launch scripts
↳ get all flights from db
get all aircrafts from db
get all airports " "

I created React context to pass var and useStates
throughout APP

- finished my two sections

↳ All flights

↳ Admin

Navbar Component = 100%
Flight Info Page = 20% → 10%
Flight Section Page = 20% → 10%

Throughout the project

- I have helped Jack with the db
- Kam with the frontend
- Finley with the flight generation
- I set up and organized the github
- I set up frontend react app
- I set up Backend Node Server
- I set up a lot of integrations
